Williamsville 21, N.Y.

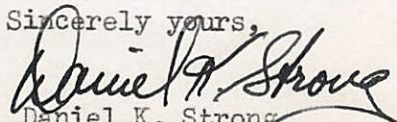

Dear sir:

Thank you for your report of having heard our test program of last March 11. I have examined the log and find your information is accurate.

We operate at 250 watts into a 300 foot vertical guyed tower using Western Electric Transmitter utilizing grid bias modulation in the finale stage. The finale stage consists of six WECO 242-C tubes.

Thank you again for your report and may you have good listening.

Sincerely yours,

Daniel K. Strong  
Chief Engineer
