March 8, 1930

J. W. Brauner;
Dear Sir:

Received report of your reception of our station W L E Y on the morning of March 2, 1930 and wish to say that it is correct. Your report, Mr. Brauner, is very complete and we appreciate it. We have three stations here, two broadcast stations W L E X - 500 watts; W L E Y - 250 watts, and W I X A Y - our television station. We are building a new station to replace W L E X and it will probably be on the air very soon and we would appreciate any report that you may have on its reception. W L E X is on a frequency of 1410 kilocycles. Thank you, Mr. Brauner, for your comprehensive letter and we hope to hear from you again.

Sincerely,

Herbert A. Ingalls

Chief Operator

W L E X - W L E Y - W I X A Y
