Mr. J. W. Brauner  
23 Howard Avenue  
Williamsville 21, New York

Dear Mr. Brauner:

Thank you very much for your report of our equipment test broadcast on March 26, 1949.

We were especially appreciative of your comparison between our signal and that of the Brockton station because it is conclusive evidence of the poor conditions during our test broadcast.

We have checked your report with our station log and find it to be correct; therefore, this will confirm your reception of WARE.

Transmitting facilities at WARE are located atop Coy's Hill in Warren, Massachusetts about midway between Worcester and Springfield. We were operating with a power output of 500 watts using a non-directional antenna.

Again, thank you for your interest and with best wishes for your DXing success.

Yours very truly,

RADIO STATION WARE
