

# WALM

*Serving Albion and Marshall*

December 16, 1952

HAWES BUILDING  
ALBION, MICHIGAN

Mr. J. W. Brauner  
23 Howard Avenue  
Williamsville 21, N.Y.

Dear Mr. Brauner:

From the information contained in your letter it appears you have heard our signal in New York.

220'

WALM signs on Sunday morning at 8:00; our transmitter is RCA, and the ~~75~~ vertical radiator is shunt-fed. The temperature here at that time was 30 degrees, and the ground covered with about 2" of snow, with a light snow falling.

WALM has no regular after-midnight test period at this time, but I shall be happy to keep your letter on file, along with others I have received, and drop you a card when WALM plans an after-midnight broadcast.

We thank you very sincerely for your letter, and appreciate your information very much.

Very truly yours,

Lewis M. Shroyer  
Manager
