Dear Mr. J. W. Brauner,

I have your most recent letter in regard to D X on W MBN and I can very easily look in our files and find two letters in answer to your previous reports. Somewhere they have gone astray. So here goes again.

Your report of hearing us April 18, 1947 is correct.

W M B N conducts Frequency and Equipment checks every Third Wednesday of each month 1:30AM to 1:45 AM E S T.

There must be an error in WWGF listing, I do not know where it can be or what it is about. I have your other letter asking about it also, dropped you a card on that.

You should have dropped in when you passed by, you would have then visited the Smallest Radio Station in this part of Michigan.

We answer Mail and handle lots of it, where ever you got the idea to the contrary is a mistaken idea.

Then too, for more dope on DX we have a listener in Indiana who listens to us every morning from 7 till 9 AM.

Your report, and others like it prove that we are radiating and things are in good order, however DX cannot be depended on and taken in as the area we serve. Our Secondary Area we figure is a radius of 50 miles.

Many thanks again for your report and don't lose too much sleep if you don't hear us on our Frequency Check Periods as our Frequency Monitor Station has trouble to receive us at times, due WEXL at Royal Oak Michigan.

Yours sincerely,

R. W. Pierson
