THIEF RIVER FALLS  
MINNESOTA

January 26, 1947

Dear Sir:

This is to verify that you did receive our test transmission January 23 between the time of 3:48 and 4:44 AM. We did have on a musical program at the time but evidently the interference from other stations prevented you from distinguishing our program. However the station breaks that you listed are correct.

We're using a W.E. 310B transmitter. Our antenna is Blaw-Knox square tapered vertical, 179 feet high. And the transmission line is a 6 wire open line 850 feet long.

For the past eight or ten nites we've been on after mid-nite and will be on for the next two nites but then our test period will be about finished. After that we do not know which nite will be designated as our test period.

Hours of regular broadcast will be from 7:00AM to 11:00 PM.

Thanks for the letter, we were glad to hear from you.

Yours truly,  
H. J. Bothman Chief Eng.
