Mr J. W. Brauner,
Syracuse, New York.

My dear Brauner,

Thanks a lot for your very kind letter. I appreciate these letters more than you think I do.

The old set is sure going out. Those birds over in the Newark DX club sure lay waiting for us as half of our letters are from New Jersey. We get reports from all over the States and we have had one from New Zeland.

I would like very much to pick up our signals at the distance we get reports. They all have the same yarn about "how do you do it on 100 watts" and "how much extra power were you using as you came in like a local 1000 watter.

Assuring you that we are always glad to hear from you Brauner, I am

As ever,

Ed Krebsbach
