Mr. J. W. Brauner  
23 Howard Av.  
Williamsville, 21, NY

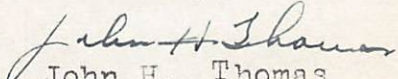

Dear J. W.,

Thank you very much for your letter of Nov. 9, 1947 reporting reception of WADE. I had no idea that we were getting that distance during day light hours which we operate in. We have gone on test broadcast after mid-night several times and have had reports from your part of the country.

WADE went on the air in July of this summer and we operate with a power of 1000 watts using a Gates transmitter and a 300 ft. tower. Our ground system consist of 8 miles of wire buried in the ground. We hope to have nighttime operation on some future date.

Thanks again for your DX report.

Sincerely,

  
John H. Thomas  
Chief Engineer
