Galier, Pa.

Mr. Brauner

After checking the official log of the station, I am very pleased to report that your reception report is entirely correct and we greatly appreciate your time and effort in informing us of our signal.

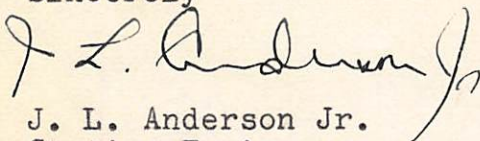

We use a one KW Gates BC 1T broadcast transmitter with a power reduction kit to bring the power to 500 watts. We feed a .3 wavelength antenna with a resistance of 115 ohms and an antenna current of 2.08 amps.

Our regular broadcast day is from 4:30 am until local sunset Monday through Saturday, and from 6:00 am until local sunset on Sunday.

We hope you will be listening for us again and if we may be of any further service to you, please let us know.

Thanks again for your time and consideration,

Sincerely

J. L. Anderson Jr.  
Station Engineer  
WGAS Radio
