Williamsville 21  
New York

Dear sir;

We certainly appreciate your report on the reception of WHNC on the morning of the 8th of Nov. Your report checks with our log.

Thank you for the nice report on the quality of modulation, since being here I have strived to improve it, and there is still room for improvement, though at present it is only minus 3db below normal for a flat line.

Our antenna is 277ft high, a vertical, with 90 radials each 277ft long. Tubes in last stage are a pair of 1627s push pull.

Again thank you very much.

Very truly yours,

-----
