

1/5/77

Dear Mr Brauner

I am happy to confirm your reception of WDCR on the morning of December 20, 1976 at 1230 AM EST. The program details you supplied were correct. WDCR was operating experimentally at this time with a power of 1000 watts.

Your report was one of over 50 we recieved from 17 states and one Canadian province. This great number precludes my sending you a personal letter, which I would truly like to do.

Thanks for listening,

*Jordan Roderick*
