1954

J.W. Brauner  
P.O. Box 22  
Valier, Penna.

Dear Mr. Brauner;

This will confirm reception of our signals,  
0110Z, December 10, 1954.

WMLV tests regularly each second Friday of the  
month beginning at 0100. A special DX test will be  
run January 10, 1955, beginning at 0303 until 0400. (EST)

The variance in the modulating signal you heard,  
was a new type Neon oscillator, operating without a beat  
note. We are appreciative of your comments, for our test  
period is given part for frequency check with RCA and a  
standard test for modulation immediately following.

Once again our thanks for your interest in WMLV.

Good DX hunting.

73,

*R.G. Ballou*
