Dear Mr Brauner

Well here we are again at long last. Thanks for the letter and report concerning the November 15, 1948 frequency check program. I hope you will accept my humble apologies for the tardiness of this reply---Xmas and New Years just threw a kink into every-thing that came along. However I am back in the saddle again and hope to keep all concerned happy.

Concerning your report, I don't have any doubt that it was KOBE you were listening to and so lets call it good.

Pardon me if I cut this short but I have a stack of mail to answer that falls just short of mountainous. However, I do appreciate hearing from you and if you care to carry the ball further I will co-operate. Remaining,

Sincerely yours

Kenneth M. Dean

Chief Engineer.

P.S. And Along with everything else this should get mis-addressed!
