WILLIAMSVILLE, 21 NEW YORK

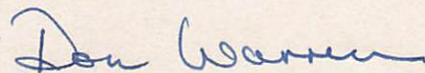

Dear Mr Brauner,

This is to verify your reception of KSWS. we are on the air every Friday at 2:30 AM for our frequency check, due to the fact we have been operating with out a frequency monitor.

Our transmitter is a RAYTHEON 250 W (RA 250) as is our console and studio equipment, however the audio oscillitor and amplifier used for the frequency check is a home made outfit and the mike used during the check was an army surplus, dynamic tank mike. So it is surprising that our reception was readable.

Thanking you for your interest and information.

RESPECTFULLY

DON WARREN
