REPLYING TO

MR. JOSEPH BRAUNER

17 Spring Street

Williamsville, New York

Dear Sir:

Your report on our recent test transmission from 3XN is greatly appreciated. The program to which you listened is a part of our development work on a 50 KW Radio Transmitter intended primarily for broadcasting applications and it is helpful to us to know how its signals were received in your locality.

Being a purely experimental station, we do not operate on a definite schedule. We expect, however, to have occasion to transmit at times throughout the next few weeks under a variety of conditions with respect to power, carrier frequency and antenna.

Thanking you again for your interest and cooperation, I am,

Yours very truly,

Assistant Apparatus Development Engineer
