Williamsville 21, New York

Dear Sir:

We are very happy to verify your reception of WBBF on Saturday, October 17, 1953.

The reason for the change in call letters is because we are under a new ownership.

You surmized correctly the reason for the weak signal in your direction. We use a directional antenna system which has a null in the direction of Detroit and of course Buffalo. This is for the protection of radio station WWJ.

We certainly do appreciate the time and trouble which you have taken to report WBBF's signal. It contained information which is of great intrest to us. If you notice any change in our signal, w~~a~~e would be very glad to hear from you. Thanks again for your report.

Sincerely yours,
WBBF
