J. W. Brauner,
17 East Spring st.,
Williamsville, N.Y.

Dear Friend:

Well, you can always depend on Brauner for a good report! Do you ever miss anything? George Bissel and I are down here from WHDL now, and we are quite tickled with this new installation. When you heard us, we were principally interested in knowing how far the ~~xxx~~ carrier could be heard, and had not yet installed the studio amplifier which goes with our new 100 watt De Forest transmitter. However, by the time this reaches you, we hope to have the entire installation completed, including our new velocity mikes, and we hope to show you some real quality! Of course, your report was correct, and we hereby verify.

Yes, it was our first night on the air, and we are still testing. Our farthest report so far was from Elkhart, Indiana, with one from Rochester, Michigan. Farthest south, Baltimore. North, Montreal.

Sorry I haven't the time to write the letter I would like to, but I must finish answering the first 65 letters, before some more come in! Best regards,

Alan F. Burgess,
Announcer/operator, WGLC.
