ROBERT B. RODDY
General Manager

Dear Mr. Brauner,

I would like to thank you for your reception report of our test transmission on August 27. As we do not have any special QSL's, I hope this letter will serve the same purpose.

WIPS operates daytime only with one thousand watts using a Raytheon, RA-1000 transmitter feeding a guyed 200' tower with a standard radial system approximately 100 yards from Lake Champlain.

At the time you heard us we were conducting our regularly scheduled frequency check. Following our frequency check which terminated at 12:15 EDT we made the announcement "This is Wips Ticonderoga, N.Y. Testing which we followed with various tones and then signed off at 12:20 AM EDT

As this station is now under new ownership and I am thier new C.E. I would like to arrange with the National Radio Club for some special test broadcasts so that I may obtain information on our skywave performance. Would you please notify me as to whom I may contact in order to set up a special transmission.

Thank you very much for your cooperation.

Yours Sincerely,

Wayne B. White
