January 3, 1954

Dear Joe,

Your very interesting letters were received here during the past few days. Your reception report on WLNA, Peekskill, New York, operating on a frequency of 1420 kcs., with a power output of 977.532 watts at time of reception is hereby VERIFIED. Congratulations!

We had loads of fun putting this show on for the NRC, and so did Lefty. Even though the undersigned had a lot of work in preparing the script, the mail we receive is a sufficient reward.

The program which you heard, as you already know, was a special DX broadcast for our fellow NRC members, from 3-5 A.M. EST, on December 28, 1953.

In the past five days, we have received over 50 letters and cards telling of reception. Some are really corkers. We'll attempt to tell about some in our letters in the DX News. All the West Coast and Southern reports will be in next week, so we'll have our hands full with mid-term exams coming up.

Sorry, but there are no more QSL left.

Thanks again, Joe, for both your letter to the station, and to the club itself. Your comments were appreciated.

P.S. Tnx for the Xmas card.

Yours DXingly,

Kenneth Mayfath
Peter Hansen
Alex Mackenzie

The boys of the Croton DX Club.
