17 Spring Street
Williamsville, N. Y.

Dear Sir:

This is to confirm your receiving this station on the night of November 10, 1928.

We are pleased not only in hearing from you but in the fact that you can continue to enjoy our programs. To us the second letter from one of our listeners is a direct statement that we are broadcasting programs that people enjoy.

For your private information we are installing a system of one hundred per-cent modulation which we believe will aid us in reaching out a greater distance. This system will be in operation within about three weeks. If you notice and improvements in our tone quality or that our signal is any stronger we would be very glad to have you let us know just what condition you experience in picking us up.

Yours very truly,

Broadcasting Station WLBV

Kenneth L. Blackstone

Director of Radio.
