Mr. J.W. Brauner
17 E. Spring street
Williamsville, N.Y.

Dear Mr. Brauner:

Many thanks for the very fine report of reception of KBIX. It is one of the most complete and helpful reports that we have ever had the pleasure of receiving.

But there was one thing in your report that is hard for me to understand. That is the unmodulated carrier that was on 1500 k.c. the same time that we were testing with the Government. We were supposed to have the 1500k.c. channel clear at that time. Not that the thing would be of any importance as long as they could receive us at Grand Island, Nebraska; but it certainly does mess things up for us when it comes to getting D X reports, and being a new station we like to get as many as possible.

Again may I thank you for your very fine report and invite you to listen in next month-(Oct.13)-for our next government check. Also tell all your fellow members of the Newark News D X club that we will be more than glad to verify their reports.
