Mr. J. W. Brauner  
23 Howard Ave.  
Williamsville 21, New York

Dear Mr. Brauner,

We regret that you did not receive prompt verification of reception of KMUS during the frequency test period of Dec. 13, 1948.

After checking the program and transmitter log for the period 1:14 AM to 1:31 AM of that date, we are convinced your report of reception is authentic. The program log included the names of recorded numbers that were played, and these were the same as given in your letter.

We wish to thank you for your interest and hope you will accept this belated verification of reception of KMUS for December 13, 1948. Also, our frequency check period has been changed to 5:30 to 5:45 AM C. S. T., thus accounting for your inability to pick us up during the past year.

Sincerely,

*Paul L. Alexander*
