J. W. Brauner

Williamsville, N.Y.

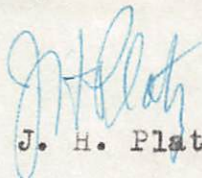

This is to acknowledge two letters, the first dated December 29th reporting suspected reception of KIHR. We are sorry to report that we were not on the air at the time reported.

However, your second letter of January 12th can be definitely confirmed as a successful reception of our special DX program.

I'm sorry to be so slow in answering. While I was with KIHR I was also engaged in business for myself and I was really hopping all the time. Shortly after the special program I was faced with the prospect of a year or more in the hospital and I left the KIHR organization. After several weeks of complete inactivity, it developed that the suspected disease was not present but in the meantime I lost much valuable time which I am still in the process of making up, hence this late acknowledgement.

We thank you for your report and appreciate your patience.

Yours,

J. H. Platz

Formerly Chief Engr. KIHR
