Williamsville, New York

Dear Sir:

Was very glad to get your letter of March 10, 1943 reporting reception of KWRC on our frequency check program. It is indeed a pleasure to know that KWRC is "getting out" so well. We have all RCA equipment with the exception of the tower, which is wincharger. The transmitter is the 250K, and is driven by the new RCA limiting amplifier which contributes much to our good coverage.

Any time you have occasion to check us in the future, would appreciate **your** dropping us a line.

Sincerely yours,

Paul E. Walden
Chief Engineer
