Mr. J. W. Brauner
23 Howard Ave.,
Williamsville 21,
New York.

Dear Mr. Brauner:

This letter will verify that you heard our signals on the morning of November 10th. Thank you for your report. KROF was bothering our measuring station over in River Head Long Island, even with his directional antenna.

We use a Collins 20T feeding a 240' guyed tower. We feed the tower with a 7/8" coaxial cable. We are a daytime scheduled station at present but hope to full time at a later date. We are going to run some night for an hour or so for the Newark Club----maybe you get their news letter and can listen in.

Thanks again and best luck in you dxing.

Very truly yours,
Howard Bair
