Mr. J. W. Brauner

P.O.Box # 22,

Valier, Pa.

Dear Mr. Brauner:

Many thanks for your very nice letter of March 11, 1958, which may or may not have been answered. You see I have been made chief engineer recently and your letter was among a host of others in my desk drawer which had apparently never been answered so now I am trying to catch up on the back-log left me by other chiefs. I hope you will forgive us all for not getting to this sooner.

Thank you for the report you sent us on how we are getting up your way. It makes us feel good to know that we are doing so well and the valuable service you have performed for us voluntarily is very much appreciated by us. I am sorry we don't play the kind of music you say you liked but I hope you can find a little enjoyment in at least some of it. It is a lot better than rock-n-roll going by the letters we get here on our music format.

A few years ago I built a two tube regenerative receiver using a pair of type 30 tubes and I tried to see how many stations I could log with it. Got quite a lot too but not as many as you. I don't recall now how many. I didn't know then to write to the stations for verification so I missed out on some of the fun. If I had the time now I would go at it again. I am a ham operator now with callsign W 3 O F E and I try to spend a little time on the short wave bands-- darn little time I get though. If you hear me on some time let me know. I am on the 75 meter band mostly and usually can be found on the MARS frequencies.

Thanks again for your enjoyable letter and the report and I hope to hear from you again. Please let me wish you many many more hours of BCLing and if I can be of any service to you just call on me as I am

very truly yours,

Harvey E. Cunningham
Chief Engineer
