Dear Sir:

This is to acknowledge your DX report of Dec. 5 and thank you for dropping us a line. Glad to hear that we can be picked out of the QRM at that distance. It seems that our skip is hittin in your section of the country at this time. I ahve had several reports from N.Y. and Vermont.

We are still running program test and ironing out the bugs but at present things are running pretty good and I say this with my fingers crossed. Our hours are from 5:30 am to 12:00 midnite and most reports seem to catch the sign on. We donot play the National Anthem at sign on as yet. I donot have a definate freq. test sched. arranged at present but hope to in the near future. We use R.C.A.C. at Riverhead, N.Y. and usually test around the third monday of each month between the hours of 12:15 and 12;30am.

You were right about WORD being on 1400 in the past. They increased power and switched to 910KC at the same time. Right now they are hustling to get a TV station on the air on chn.7 for this area.

Thanks again for the report and hope to hear from you in the future.

Yours very truly

James L. Tate
