Thanks for your communication on our test program the morning of Thursday Mar 7th You know we do not attempt to write and answer all the letters we get on a program of this kind this would be impossible but a nice letter like yours we must answer The reports by letter and card are still coming in so we can not as yet tell you the most distant point this will take another week

When we can tell you this our Station card will be sent you and it will tell of this also from the reports so far we have evidently been heard in nearly every State

We were on this test program using a power of 35 Watt we have been granted an increase from 15 to 50 Watt but are as not yet using it we are using the old generator which is only 750 volt and should be 1000 for 50Watt

We perhaps will not have another test program till next fall as it is getting late in the season but when we do we are filing your name and will surely let you know

Yours truly
Home Auto Co
