DEPARTMENT OF ELECTRICAL ENGINEERING

Oct. 13, 1933

J. W. Brauner,
17 East Spring St.,
Williamsville, N. Y.,

Dear Sir:

Was glad to receive your report on our 2:50 to 3:10
a. m. C. S. T. test program on the morning of Oct. 6.th

There is no doubt but that you heard us, although the
evidence is very meagre, as you say.

We received reports from as far east as Vermont, but very
few east of Ohio. Our best reports came from the south, as our
antenna system evidently has a directional tendency
toward that part of the world.

Hoping you will be able to do better at the next test
period, I am

Yours very truly

E. E. Clark

Op. of WEAT.
