

WEKR

Fayetteville, Tennessee

Jan. 27, 1949.
Radio Station WEKR.

Mr. J. W. Brauner
23 Howard Ave.
Williamsville, 21, New York.

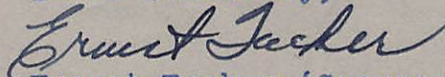

Howdy J. W.;

Thank you very much for the very nice letter saying you heard our program Jan. 25, 1949. at 2:30 am Central Standard Time. And thank you for the very nice comments you made about the show. WEKR operates on an assigned frequency of 1240 KC. with a radiated power of 250 watts. We operate from 6:00am til 10:05 pm. We have to do a frequency check once a month and as I am the head of the "TENN. TUNETWISTERS" and also assistant Chief Engineer we decided we would put on a program with the frequency check and see if we could draw any listeners and we sure did. We have recieved lots of letters here but I think I have enjoyed yours most of all. Fayetteville is a small town located in the central portion of the state and we have a population of about 7000 inhabitants and a very prosperous little town. We have a Big Jamboree here on Sat. nite and The Tenn. Tunetwisters are some of the stars on that show. We also have a big square dance here each Friday night.

The reception certainly is verified and I imagine we will put on another program next month as we had so much luck with this one. We invite you to listen in at that time and want to thank you for writing to us.

Til we hear from you again I remain,

Yours Sincerely,

Ernest Tucker (George Washington Tucker)
