J.W. Brauner  
23 Howard Ave,  
Williamsville, N.Y.

Dear Mr. Brauner:

I am very sorry to keep you waiting on your confirmation of our signal report heard April 19th. We wish to thank you for your nice report of reception and to verify that station breaks and recording were given at the times stated in your reception report.

Surely glad to hear that our signal was good, clean and good quality. We of the engineering staff feel highly complimented by your letter and wish to state that we strive for the best in signal strength and quality.

We received a large number of cards and letters from all over the states so that was one reason in the delay plus being very busy completing the station for regular program operation. We have been on since April 30 on program test.

We wish to thank you once again for your nice report and wish you the best in radio reception.

Sincerely,  
*R.T. Whitaker*
