Williamsville, N.Y.

Dear Sir;-

Many thanks for your letter giving proof of the reception of my test broadcast.

We are on the first Thursday of each month, and no doubt you will hear us better next time - as by then I hope the storm season will have passed; we have had some twenty odd storm reports this season - only a few of them however really meaning anything much, although the report of one is enough to make most people think and wonder if it will come in at our coast line, and we were very fortunate not to get one, as a few of them were pretty tough - we expected to get something on the 4th of Sept., as it looked mighty bad here then, but it passed us and went on into Brownsville, Texas, below us.

Yours very truly,

Geo. R. Clough
