

October 14, 1938

Mr. J. W. Brauner  
17 E. Spring Street  
Williamsville, N. Y.

Dear Sir:

Thank you for your report on reception of our Frequency Check program of October 10th, which checks with our log.

We are using Western Electric equipment throughout transmitting on a day time power of 250 watts. Our radiator is a Blaw-Knox grounded vertical.

In addition to the Federal Communications Commission frequency check we transmit a commercial frequency check on the first Wednesday of each month from 1:30 to 2:00 AM CST.

We would be glad to consider you as one of our regular listeners on these programs, and would welcome further reports from time to time.

Sincerely yours,

RADIO STATION KPAB
