March 11, 1950

Dear Mr. Brauner:

I wish to thank you for your letter of February 27, 1950 and wish to confirm your letter of reported reception of KVET of February 27, 1950 from 2:42 am to 3:00 am CST. Your log is consistent with our log and therefore I wish to confirm your reception of KVET.

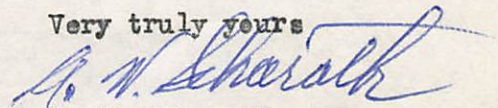

Our equipment is mostly Western Electric. We use directional antenna at night and during part of the test we operated on non-directional antenna and on the other part on directional antenna.

I am mighty glad you got to hear KVET. The response has been very good on this equipment test and was glad to do this for the clubs.

I myself am a radio amateur W5H2M but do not get too much time to do any hamming.

Thank you and good listening.

Very truly yours

A. W. Scharath
Chief Engineer
