J.W. Brauner  
23 Howard Ave  
Williamsville 21, New York

Dear Mr. Brauner,

This will verify your report of reception of KXIT on the morning of April 21st and April 22nd.

Your reply would have come sooner, if it hadn't been for the fact that we just got on the air and there has just been too much other work to do around a new station.

We have recieved many reports from your part of the United States, in spite of WING. All of them have reported interference from WING. I don't know where they were on the night of the 21st. No other reports for that broadcast mention them, however they were from listeners west and north of us.

I hope that this will confirm and verify your report. Many thanks for your help to a new station.

Sincerely yours,

*William J. B. Smith*

Chief Engineer
