November 8, 1954

Mr. J. W. Brauner
23 Howard Avenue
Williamsville 21, New York

WAFC is pleased to verify your reception of our signal
from 4:45^A M to 4:55^A M 11-3^H Standard Time.
Thanks for your interesting report.

Your letter was of special interest because one of
our cohorts here at WAFC, Mr. Carman Tubby, says his
parents live in Williamsville, and he once worked near
Punxsutawney, Pa.

Your report was correct in every detail. It was
interesting to know that we could come in through the
signal from CHML.

The transmitter of WAFC is a Gates Model BC-1F, with a
power of 1,000 watts operating on 900 Kc. with high level
modulation. Our antenna is a triangular cross section guyed
with a breadth of 22 inches and a height of 255 feet.

Wishing you every success in completing your desired list
of stations, we are,

Cordially yours,

RADIO STATION W A F C
