

WAYB *The Family Station*

WAYNESBORO BROADCASTING CORP. — One of America's Finest Radio Stations — P. O. BOX 938, WAYNESBORO, VA.

March 5, 1948

Dear Mr. Brauner:

This is to acknowledge proof of verification, on the reception of our signal on the day of Dec. 19, 1947.

The transmitter in service is a W.E. type 451-A-1, direct crystal control. Last stage having (6) 50 watt vacuum tubes for Grid Bias Modulation (W.E. 242-C). Maximum rated carrier power output 250 watts.

W.E. antenna tuning unit, A vertical antenna Wincharger type 180' (185' overall height) of uniform cross-section, guyed, series fed. Ground system 90 radials 165' in length copper.

W.E. limiter, 1126;C, G.R. Frequency monitor, G.R. Modulation monitor. A Raytheon studio console.

Thank you for listening.

Yours truly

Joseph Hendrick
