Mr. J. W. Brauner

Dear Mr. Brauner,

Thank you very much for the report of reception on this station on March 30, 1960. Your report is correct. The test was late in the morning because I had been working on the remote control section and had been up at the transmitter house putting in new resistors that had burned up during the day.

I am sorry to be so late in verifying your report. My house burned up this summer and also I am in the 2 way radio service and the station keeps me busy all the time. I have the house built now and can slow down some.

I will be putting on a DX broadcast this winter for some of the clubs. I hope you will be able to hear our signal there again this winter. I see you have a good antenna there for bc stations. I think a good long wire is good for bc stations. Its just like a sail in the wind, the bigger it is the more air you catch. HI.

Thanks for the postage. I will be glad to hear from you again soon. I may answer faster next time. I hope you did not get discouraged.

best of dx.
