"The Mutual Voice of the Twin-Ports"

J.W. Brauner
17 E. Spring St.
Williamsville,
New York.

Dear Friend:

9/9/39.

We take this means to thank you very kindly for verification of our reception, and frequency check. You, yourself, being a member of the National Radio Club realize how it makes one feel to hear a report of good reception.

WDSM, is powered by 100 watts, and is operating upon a frequency of 1200 Kilocycles. The technicalitys of your letter went slightly over my head as I am Continuty manager and Announcer. I suppose you have no time for "them animals". I hope you forgive my answering in place of the Chief Engineer, but you will no doubt understand that with a new station many last minute preparations are in order. We will open officially on the 22 of September. Thanking you again, I remain,

Very Sincerely Yours,

John Wiley

WDSM Continuity Mgr. & Announcer.
