J. W. Brauner,  
23 Howard Ave.,  
Williamsville, 21, New York:

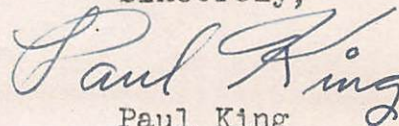

Dear Mr Brauner,

Your communication of the 24th August received and duly considered concerning verification of report of reception contained therein. YOUR report of reception was, I must say in full detail and exceptionally accurate. We most certainly do want to confirm the data you advanced, and likewise want to thank you for same as well as to express our gratitude at your interest in our new station.

For your more accurate information, we were conducting our frequency check with the Phelps Precision Laboratories at Minneapolis. Our station has been in operation since March of this year with a power of 250 watts on a frequency of 1240kcs. We are located about a mile east of Rhineland on US Highway 8 and operate from 7 AM to 11 PM. We are combination men for the most part and are otherwise much similar to any other station containing both transmitter and studios in the same building.

Thanking you again for your interest and report, I remain

Sincerely,

Paul King

Announcer-Engineer
