January 11, 1949

Dear Mr. Brauner,

Thank you for the nice report from the State of New York. We seem to receive a lot of reports from that part of the country. Evidently, it must be just the right skip distance for our frequency. We didn't expect much response this time as conditions were very bad on January 6th.

Glad to hear that you have traveled in the state of Wisconsin and have seen our installation at least from just passing by.

The selections that you mentioned were among those which were played. The entire program was recorded on a Brush tape recorder and played back as program material for the Frequency test. In this way, One person can make the Frequency check all by himself.

We hope to hear from you again in the future.

Sincerely yours,

Joseph C. Binko
