Daly City, Ca. 94105

Dear sir,

This is in response to your reception report DC-190-57 of February 1, 1971. Your report was found to be correct. I have also received a report from Warrenton, Oregon on the same morning. Apparently the skip was good.

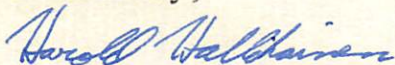

KSLY operates on 1400 KHz with a Gates 250 Watt transmitter. The antenna is a series fed tower, 150 feet high.

We operate 24 hours a day with rock music.

We have just received a construction permit to increase our daytime power to one KW.

Thanks again for your report, and keep listening to the Famous Fourteen.

Sincerely,

Harold Hallikainen
Chief Engineer
