Mr. R. A. Karchevski
119 Hemenway Street
Boston 16, Massachusetts

Dear Sir:

Many thanks for your reception report of our test program on March 11, 1963. Your report is correct.

Please accept our apologies for the long delay in answering your report, but due to the illness of the CE some of the report were mis-filed and not located until this past week.

We do not have a coverage map available at the present time, however the 10,000 watt transmitter is a directional array designed to give maximum protection to WCAU, with the maximum radiation northward from Saginaw.

The return postage from your second letter is enclosed.

Very truly yours,

Ed McMullin
Program Co-ordinator
