THE VOICE OF OKLAHOMA
SINCE 1925

MAR 5 1970

We are pleased to verify your report of reception on February 23, 1970 at 2:30 am. The picture, on the front, shows our studio building. Our transmitter plant, 11 miles east of Tulsa, includes the main 50 kw and 5 kw auxiliary transmitter with three 0.56 wave length vertical towers producing a cardioid directional antenna pattern radiating nearly 100 kw to the southwest at night.

Please pay us a visit when you are in Tulsa
