

ste-anne de la pocatière

May 3, 1962

Mr. R.A. Karchevski,  
188, Marlborough St.,  
Boston 16, Mass.

Dear Sir:

Many Thanks for your report. The audition you made of CHGB on April 21 between 18.49 and 19.26 EST is perfectly wright.

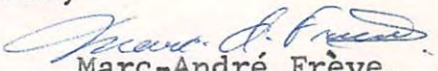

CHGB is at 1310 Kc and at 5,000 watts since November 21 1961. Our transmitter is a Collins 21 E and we are omnidirectional in day time with a night pattern N 35 E.

Ste-Anne is a small city of 5,000 population. We are located on the St-Lawrence River, and that's probably why you listened to us instead of the other stations also on 1310, Ottawa and Richmond Hill.

You'll find included a coverage map of CHGB.

Hoping this is at your entire satisfactinn,

Truly yours,

  
Marc-André Frève,  
Chief Engineer.
