"TOP GUN RADIO"

PHIL ROBERTS, Manager

Howdy!

Many thanks for the signal report. It's good to know that this li'l kilowatter is being heard up in your neck of the woods.

For your information here's a brief technical description:

BTA 1R2 RCA Transmitter operating at 1 Kw Day only hooked to a 226' stick measuring 57 Horseshoes, licensed operating current of 4.23 Amperes.

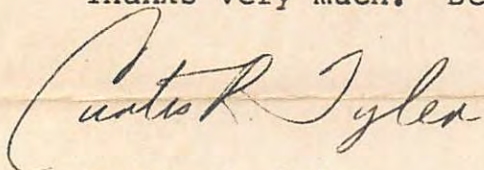

Fed from TELCO B.C. loops by All RCA Equipped Control Rooms (2) matched up with RCA BC3C Consolletes.

For VHF DXers I'll add we have a li'l ol' Marti Electronics 30 watt R.P.B. unit that operates on 161.73 Mhz. and the first accurate sig-report I hear on it I'll be tickled pink to send you a brand new RCA C&W album. Being an amateur op myself I do appreciate to know that I'm "getting out".

I'd like to extend a great big welcome to you personally if you're ever in our neck of the woods do drop in and if you let me know ahead of time I just might drop an extra chicken leg in the pot.

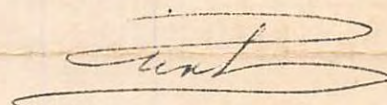

Thanks very much. BCNU later,

73's or 88's (whichever)
