1030 kc

50,000 watts

Telephone TULip 4-3541

402 SOUTH CHAPARRAL --- POST OFFICE BOX 898
Corpus Christi, Texas

Dear Mr R-A. Karchewski

Thank you very much for your DX report of 24 April. The information which you furnished is correct and I am happy to verify your reception of our station.

We use, as a primary transmitter, a General Electric 4BT50A2, fifty kilowatt rig and for emergency use we have a Collins 21M, ten kilowatt auxillary. By throwing a switch, either may be fed to our antenna, a 250' omni-directional tower.

We are licensed to operate from local sunrise in Boston, Massachusetts until local sunset in Corpus Christi, Texas. Our frequency is 1030 kc. Our studio is located in downtown Corpus Christi and our transmitter is located near the town of Gregory about twelve miles from Corpus Christi.

Again, thank you for your report. If we can be of any further service, please write.

Yours truly,

Radio Station KCTA
