20 NOVEMBER 1972

MR. R. A. Karchevsski,

In answer to your letter of 5 November, it is my pleasure to verify your report as indeed factual and correct. The presumption that the football scores were local was correct. However there were a few mistakes, but owing to skip, interference and slop, we were very surprised to learn that you could read our transmission as clear as you did.

In order to verify the time of your reception, I have asked the D. J. who was on the air at the time to verify your report and you were correct. To satisfy your request for accuracy in your report I include the KLOG sign-off statement.

"KLOG now come to the close of another broadcast day. KLOG, KELSO Washington operates on 1490 KHz with a day-time power of 1000 watts, 250 watts nighttime. Studios are located at 506 Cowlitz Way...with tower and transmitter on the kelso elks golf course. KLOG radio is owned and operated by Washington Interstate Broadcasters, Pete Ryan president, vice president, secretary and general manager is Steve Hanson. And now on behalf of the entire staff, management and advertisers of KLOG, this is wishing you a very pleasant good (evening) (morning) ."

Hope this helped,

Sincerely,

DON BELL.....AIRMAN
