Per

J. Morgan

Director

STATION CFRC
QUEEN'S UNIVERSITY
KINGSTON, ONTARIO
CANADA

October 22, 1934.

Mr. Stuart B. Leland,
St. John Place,
New Canaan, Conn.

Dear Sir:-

We are very pleased to get your notice of reception of our lecture on October 18th, 9:00 p.m. Many thanks for the same.

Station CFRC, being principally an experimental station connected with the electrical engineering department, does very little broadcasting. During the Fall session we broadcast a few lectures for the Canadian Radio Commission. The next one is to be November 15, 9:00-9:15 p.m. E.S.T. After the New Year we broadcast a lecture every Monday 5:00-6:00 p.m. throughout January, February, and part of March. During the months, April to October, we are silent.

If you get us again please let us know what the nature of our reception is. Our power is less than 200 watts.

I am enclosing a verification card. Thanking you again, I am

Yours very truly,

(Director Sta. CFRC).
