

NOTICE OF VERIFICATION

This is to verify your reception of station WELL
on March 26, 1932 at 4:45 AM to
5:00 AM EST.

We were very glad to get your letter reporting your reception and we hope that if you hear us again you will let us know.

WELL was using about 45 watts at the time of this broadcast and the greatest distance reported was about 1,000 miles. We believe this to be quite remarkable.

Yours truly,

RB Roof

Engineer.
